

Anti-Static Polyester Cartridge Filter

Metal anti-static filter cartridges is our supplier's patent product no 2I200320117992. The concept of anti-static taken advantage from special filter media (shielding metal) offer high conductivity, grounding. **The charges on powder can be neutralized** and **difficult be adhered on the filter medium** as a result of the higher recovering rate, extended filter life span 3-5 times longer than polyester media.

Model	PA320
Size (mm)	OD330 x ID216 x H600
Filter Area	8.5 Sq.m
Material	Anti-static polyester
Thickness (mm)	0.65
Precision (μ)	3-5
Air Permeability (l/m ²)	60
Ventilation (m ³ /h)	1,000
Powder Recycle Rate	99.5%

Filter Performance Test
