

# A NEW GENERATION

FOR SPRAY PATTERN CONTROL

TO THE POWER OF 10 WITH  
**UNI-SPRAY**  
SNAP-ON NOZZLES

# UNI-SPRAY

## IS THE PROVEN ADJUSTABLE NOZZLE SYSTEM WITH THE FLEXIBILITY TO FIT MANY DEMANDS

### SPC #10

Ball and socket design nozzle tip, allows for hand adjustment up to 45°.

### SPC #9

Fast, simple installation, drill  $2\frac{1}{32}$ " hole in riser and snap-on with stainless steel, spring clamp.

### SPC #1

Can be cleaned, changed or redirected quickly by hand – no tools required.

### SPC #8

Wide selection of replacement nozzle tips, flat spray, hollow cone and threaded ball to adapt steel nozzles.

### SPC #2

No metal parts to corrode, lower maintenance costs, less downtime.

### SPC #7

Eliminates welding on half-couplings or threading pipe. Fits 1", 1 $\frac{1}{4}$ ", 1 $\frac{1}{2}$ " & 2" standard iron or plastic pipe.

### SPC #3

Interchangeable colour coded nozzle tips. (TALC) resists scale and chemical build-up.

### SPC #6

Redirection of spray pattern to accommodate changes in paint zone can be done quickly by hand.

### SPC #4

Designed to operate at temperatures up to 82°C (180°F) in acid, caustic and phosphate solutions.

### SPC #5

"Pop-In" nozzle tip, guards against leaking. Easy to set spray pattern.

BUNA/EPDM Seal Standard — Viton Optional

Using Uni-Spray glass reinforced polypropylene adjustable snap-on nozzles results in lower maintenance costs, consistent and precise spray patterns.

Nozzle bodies colour coded to fit 4 pipe sizes:  
Imperial 1", 1 $\frac{1}{4}$ ", 1 $\frac{1}{2}$ ", & 2"

"Pop-In" nozzle tip, guards against leaking. Easy to set spray pattern.

Redirection of spray pattern to accommodate changes in paint zone can be done quickly by hand.

### SPC #7

Eliminates welding on half-couplings or threading pipe. Fits 1" through 2" standard or plastic pipe.

### SPC #8

Wide selection of replacement nozzle tips, flat spray and hollow cone at very economical prices.

### SPC #9

Fast, simple installation, drill 21/32" hole in riser and snap-on with stainless steel, spring clamp.

### SPC #10

Ball and socket design nozzle tip, allows for hand adjustment up to 45°.

EPDM Seal Standard

Nozzle bodies colour coded to fit 4 pipe sizes steel and plastic:  
Imperial 1", 1 1/4", 1 1/2", & 2"

Using Uni-Spray glass reinforced polypropylene adjustable snap-on nozzles results in lower maintenance costs, consistent and precise spray patterns.

Also available in Kynar (PVDF) material.

Custom designed, non-corrosive, Risers and Headers Systems.

## NEW MARK II Clamp-on Nozzle Adapter

Non-corrosive fibreglass reinforced polypropylene EPDM Seal Standard.

- Eliminates high cost of threading or welding adapters/couplings to pipe.
- Adapts to any style nozzle. Your choice of 1/8", 1/4", 3/8", 1/2" NPT.
- Available with single or double stainless steel spring clamp for working pressure up to 125 PSI.
- Body size colour coded to fit 1", 1 1/4", 1 1/2", 2" steel or plastic pipe.
- Resistant to most acids, alkalis and other chemicals and chemical solutions.
- Temperature range up to 180°F (82°C).
- Installation: simply drill 21/32 hole.
